Calluna vulgaris	Scotch Heather.	in named varieties		
Scotch Heather the "Bonnie Purple Heather" of song and verse				
is a very lovely low-growing evergreen shrub, 6" to 3' high, of the				
Heath Family, covered in mid-summer with small bell-shaped purple				
flowers, borne on slender spikes. These flowers stay in good				
condition for some weeks, and if cut while fresh will hold their				
color and charm all winter. Honey bees, too, are attracted to				
Scotch Heather and make from it a honey that is considered very				
choice. This plant is widely known as invaluable for planting				
in full sun in sandy soil; it is also most attractive as an				
edging to beds of Rhododendrons, Laurel etc., and in Rock-gardens.				
This little plant gives most satisfaction when transplanted from				
pots. Besides the common Purple Heather there are many varieties				
which give variation in the height of plant, the color of flower,				
and the season of bloom. Below we give a list of these varieties,				
var. alba	White Scotch Heather.	early blooming, light		
		green foliage, white flowers.	3" pots	12-15"
all pot-grown, which we offer as follows:				

2 1/2" pots	.40	E	3.50	X	32.50	C
3" pots	.60	E	5.00	X	45.00	C

var. alba elata	Tall White Heather.	Late blooming,		
		very tall, straight growth.	Foliage	
		soft dark green.	White fls.	18-24"

Calluna vulgaris (cont.)

var. alba hammondii Hammond's White Heather. Mid-season,
Tall upright, growth, foliage deep rich green,
flowers white. 18-24" high. 2 1/2" pot

var. alba minor. Small leaved white Heather. Mid-season.
Tall, bushy growth, foliage very fine, light
green. Flowers white. 15-20" high. 3" pots

var. alba pilosa Late blooming. tall growth, foliage
soft grayish green. 18-20" high. 3" pots

var. alba rigida. Late. Low rigid growth, of rich deep green

var. var. alportii. Late blooming Tall, straight growth,
foliage deep rich green, turning purple in
autumn. Flowers rosy carmine. 24" high. 2 1/2"

var. argentea Silver leaved Heather. mid-season. Rather
dwarf growth, foliage green variegated white,
flowers purple. 10-12" high. 3" pots.

var. compacta. Late blooming. Low compact, moss-like
growth of bright rich green. Purple flowers
4-6" high. 3" pots

var. cuprea. Mid-season. Straight medium growth, foliage
bright, almost yellowish green, turning to rich
glowing red in autumn. Flowers purple. 12-15" high
2 1/2 and 3" pots

var. hypnoides Late blooming. Low spreading growth, foliage
soft deep green flowers deep pink. 6-12" high
3" pots

var. rubra Early blooming Low spreading growth, foliage
soft green turning purple in autumn. Flowers
rosy carmine. 6-12" 2 1/2" and 3" pots.

var. tomentosa Mid-season. Low compact growth, foliage
soft gray, flowers purple. 4-6" high.

	* 3" pots 3 yr. 1.50 E	12.50 X		
<i>Lonicera japonica henryi</i>	3" pots	.50 E	4.50 X	
<i>Lonicera nitida</i>	Evergreen Honeysuckle A tall growing graceful shrub, with long slender branches thickly clothed with small shiny evergreen leaves which turn rich purple in Autumn. This beautiful shrub is not quite hardy in the vicinity of Boston; but for southern New England, Long Island, New York and south and west it should prove a valuable garden hedge plant.			
	2 1/2" pots .50 E	4.50 X		
	4" pots 1.00 E			
	6" pots xx spec. 1.50 E			
<i>Lonicera pileata</i>	This Honeysuckle, also, is evergreen. The growth of this shrub is somewhat stiff, and spreading, the foliage 1/2 inch to 1 inch long, rather box-like, and bright shiny green. While still a small plant <i>L. pileata</i> is covered with small yellow flowers, which produce in early autumn beautiful transparent berries of clear light purple. Like <i>L. nitida</i> this shrub does not always survive the			

severe winters of this climate; but in Southern New England and South and West, it is one of the most useful and beautiful of the new shrubs, as a specimen shrub in the garden, as a shrub for rock-gardens, and as a low wide-spreading hedge.

This is one of the rarest and most beautiful of all Hawthorne. It has large white flowers in early spring. Even the young trees offered by us bear quantities of large round edible scarlet fruits in August and September, and later the substantial leaves turn a beautiful scarlet. A beautiful, small, flowering tree, suitable as a

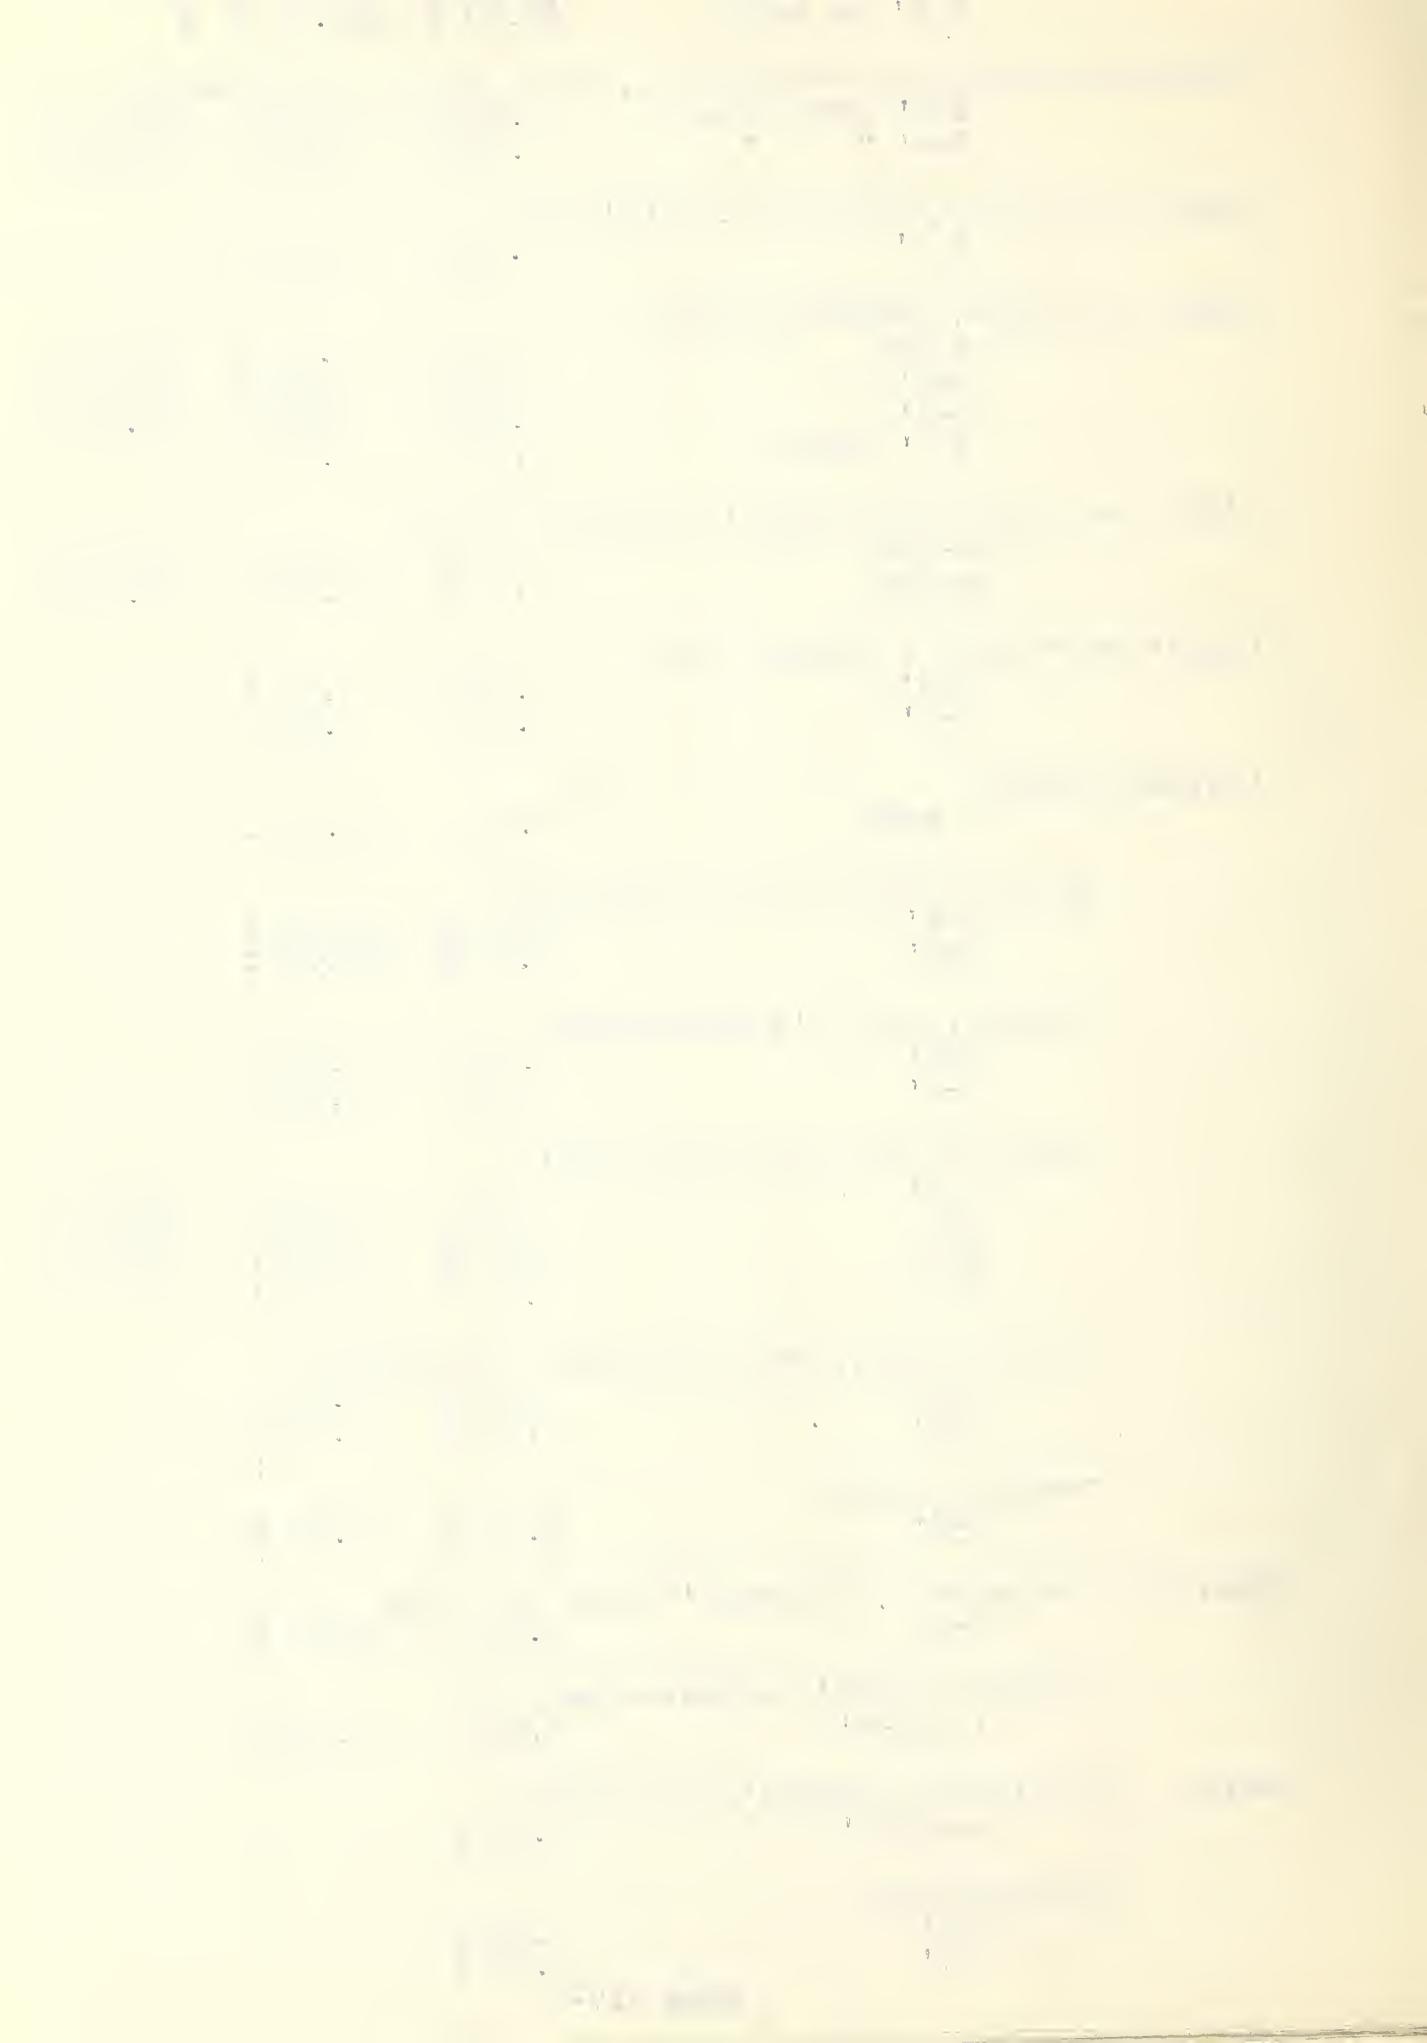

specimen, for planting in groups on the edges of woods - or near the sea.
